**FROM THE EDITOR**

***Stampshow Melbourne 2002***

*Stampshow Melbourne 2002* was held from 4-6 October 2002 at the Function Centre, Melbourne Park. There were seven entries in the Postal Stationery class with Alan Huggins' Great Britain – The First Embossed Postal Stationery receiving a Gold medal and special prize. The results were:

Alan Huggins	Great Britain - The First Embossed Postal Stationery	Gold and Special Prize
Michael Blinman	New South Wales Postal Stationery	Large Vermeil and Special Prize
Alistair Gow	Great Britain Registered Postal Stationery	Silver
Hans Karman	Postcards of the Netherlands: The Years after World War II	Large Silver
Ross Duberal	Fiji to 1954	Large Vermeil
Clyde Ziegeler	Bohemia and Moravia	Large Silver
Ian McMahon	Queen Elizabeth II Postal Stationery of Canada	Large Silver

The PSSA prize was a 19<sup>th</sup> Century etching of Melbourne Landmarks and was awarded to Michael Blinman. The exhibition also had two stationery souvenirs: the two Melbourne Park cards with a Melbourne Stampshow 2002 overprint.

***Swanpex 2002***

Swanpex 2002 featured a National one-frame class which included a pleasing number of stationery exhibits. The results were:

John Sinfield	Australia WWI Forces Lettercards	Diamond
John Sinfield	UPU Membership - It's Effect on Victoria's Postcards	Diamond
David Lu	The International Aerogrammes of China (1948-49)	Ruby
Michel Roland	Postal Stationery of the Occupied Belgium 1914-1916	Ruby
Bernard Doherty	From Postcard to Postal Card and Back	Ruby
Ross Wood	Turks and Caicos Islands Postal Stationery	Emerald
Ian McMahon	Lettercards of Canada	Emerald

**ARCHIVAL RECORDS OF  
AUSTRALIAN AEROGRAMMES, 1944-1965**

Geoff Kellow

**I. THE PRINTING INSTRUMENT REQUISITIONS**

This is the first of several articles intended to place on record the available archival records relating to Australian aerogrammes up to decimal currency. All aerogrammes in this period were produced by the Note Printing Branch in Melbourne, and such records as still survive are held by the Reserve Bank of Australia in Sydney.

The present article deals with the ordering and production of printing instruments for aerogrammes. All aerogrammes in the period under review, with one exception were printed from letterpress plates. The exception was the 1962 Commonwealth Games aerogramme, which was photogravure-printed. The technique used to prepare aerogrammes was to produce a large-size, accurate pen-and-ink drawing (one for each colour in the case of two-colour aerogrammes) which acted as a master for reproduction. The drawing was photographed and reduced to actual size and an image transferred to a sensitised copper plate, which was then etched with the design. This copper plate the master and was used to strike moulds (in lead or possibly wax), which in turn were placed in an electrolytic bath to "grow" nickel electros which constituted the printing blocks.

All these various instruments used for the manufacture of printing plates, or for the actual printing itself, were produced under the strictest security. In order to create a new instrument, a Requisition Form had to be filled out. There are two series of these forms held at the Reserve Bank archives - the NP-IR series (covering the period 1913 to 1961) and the P-4 series from 1961 onwards (at least to 1966, the latest year available at present for public examination).

These Requisition Forms represent the authority to produce each printing instrument. Each time a new printing instrument was required, the General Manager of the Note Printing Branch was required to apply to the Governor of the Commonwealth Bank (later Reserve Bank). Following approval, the NP-IR form was filled out, with date of requisition and signed by the General Manager. (At a later date, it was decided that the authority of the General Manager was sufficient, and countersigning by the Governor of the Bank was discontinued). This form gave permission for the production of the specific instrument listed, including permission to take from the strongroom any other instrument required for the production of that instrument (e.g., a steel die needed for rolling in a master plate). The time and date on which production commenced and terminated is noted, and signed by the Head of the Department concerned, and the specific workman charged with the task of producing the instrument is nominated. Finally, the date the instrument was placed into stock (i.e., into the strongroom for the first time) was given.

There are four series of NP-IR Requisition Books:

For Copper and Steel Plates (and Dies)

For Steel Cylinders

For Nickel Plates

For Electrotypes and Process Blocks (containing all aerogramme entries)

In the case of the first three series, the Requisition Forms were numbered in sequence, and the number of the form became the official instrument number. In the case of requisitions for electrotypes and process blocks, duplicate items were often required in large numbers, and it would have been tedious and time-consuming to fill in a separate form for each instrument. In this case, the requisition number became an order number, and a separate series of numbers were filled in on the Requisition form which represented the official instrument numbers for each instrument covered by that form. These official numbers began N1 in 1941 (the earliest date for which any forms have survived) and

## *Postal Stationery Collector*

continued through to N10000 in 1951. Then began a P1-10000 series (1951-1960), and a Q1-10000 series (1961 onwards). These official instrument numbers would have been inscribed somewhere on the printing instruments, but in a position such that the number does not appear on the finished printed product.

Aerogrammes form only a very small proportion of the entries in the requisition book series covering Electrotypes and Process Blocks. These books also include items such as booklet covers, postage due values, various letterpress-printed revenue stamps, or letterpress portions of other revenue stamps, and the books were also used for ordering many different types of experimental instruments. However, by far the largest proportion of the entries refer to the non-intaglio tints used for printing bank notes, for which very large numbers of plates were required.

Some books (as judged by gaps in the numerical sequence) are missing. It seems unlikely that these books now exist.

The entries presented here are largely self-explanatory, but several points need to be made:

1. The entries have been extracted by the author, who apologises for any transcriptional errors that may have occurred. The data presented here is restricted to the date of requisition, the instrument ordered, which has in many cases been paraphrased to create some consistency of expression and help with philatelic identifications, the official instrument numbers, and the date of placement into stock.
2. Aside from the matter of the missing requisition books, the entries must be complete for the period covered. The security system put into place for the creation of printing instruments meant that, without a requisition form, no instrument could be made. The researcher therefore must think very carefully before deciding to "invent" any new printing plate to satisfy their observations, because other than those listed here, none can exist. So far as the gaps are concerned, there are some other sources, to be published in due course, which will help fill some of these.
3. This listing is merely a requisition of printing instruments, with, in cases where a date into stock is recorded, proof that the instrument was created. The existence of any printing instrument does not mean, however, that it was ever actually used. That is a matter of separate record.
4. The numbers of printing electros manufactured is clearly an indication of the size of the printing plates, but care must be taken in using the requisition records for this purpose, since quite often spares were made. The size of the printing plates is better derived from the strongroom record of issues of printing instruments, which will be the subject of a separate article.

**POSTAL STATIONERY – ITEMS OF CHARACTER**

Bernie Beston

This is the UAR equivalent of a Registered Postal Stationery Envelope, Size G, obtainable only from the official Post Office. The format is familiar to all collectors of British Colonial Registered Envelopes. But like its counterparts from Palestine and East Africa, it has no stamp indicia.

Would you include it in your exhibit of Postal Stationery in Melbourne 2005? Used to Australia in September 2001. As is usually the case, the Australia Post Registered Label covers the stamps. This may save the removal of the stamps?

CEYLON POSTCARD – H&G 34

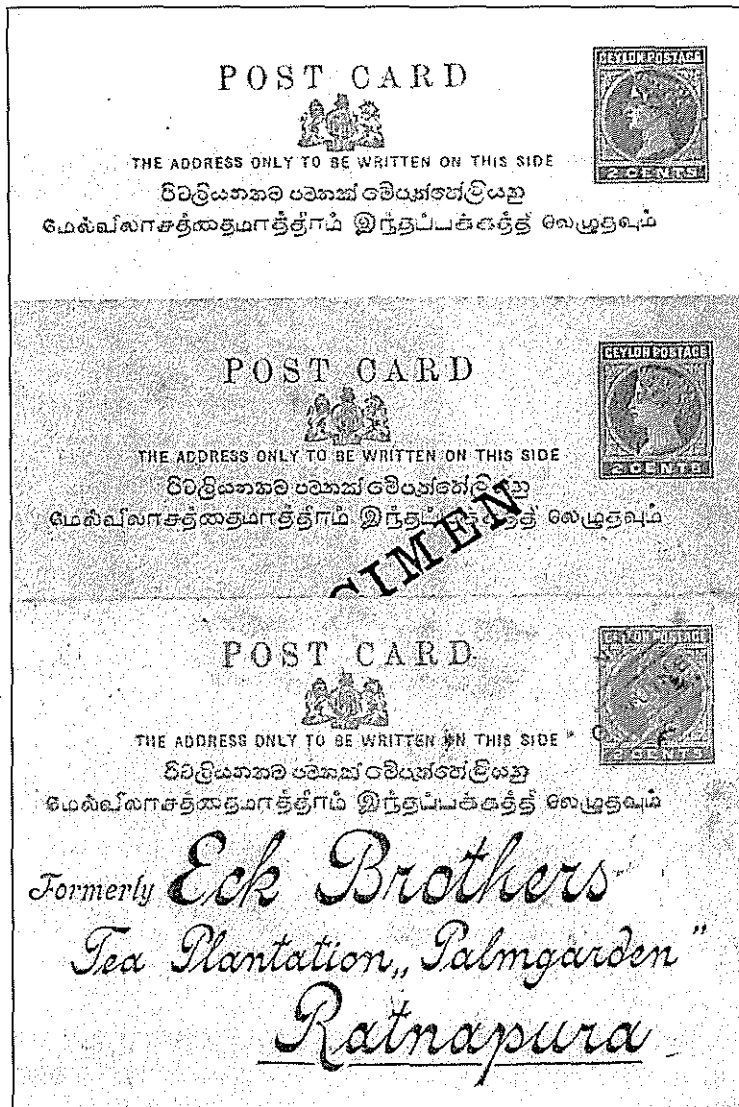

Norman Banfield

The illustration below shows an unused card, a Specimen and a card handstamped 'NOT GENUINE'. Can anyone enlighten me about the purpose of the words 'NOT GENUINE'?

Comments:

- Unused card: The card itself is in a much lighter shade than the other two but the printing appears to be in the same shade as the Specimen card.
- Specimen card: The card colour is closer to the "Not Genuine" card.
- Not Genuine: The printing is of a lighter colour than the other two. The 'stamp' design as well as the wording appear to be the same as the other two cards in respect of design, line lengths and characters. The card has been previously stuck down but the back does not appear to have had any printing on it.
- Used card (not shown): The card colour seems to be somewhere between the unused card and the other two.

I would be grateful for any information on the purpose of the 'NOT GENUINE' handstamp, by whom it was applied and when. The only thought I have is that it is a sample card used in relation to the printing of Eck Brothers address.

## THE AUSTRALIAN LETTER SHEETS

Bernie Beston

Letter-sheets were first released in 1929 for Official use only. There was only one value of 1½d, and the design was King George V (Figure 1). This was replaced the following year when the Sheet was revalued 2d with the words 'TWO PENCE' surcharged in black.

Figure 1

No further Sheets were issued until 18 January 1961, when a 5d Letter Sheet for public use was released (Figure 2). The sale price was 6d. It was printed on thin paper in orange and green. A variant of this was issued in 1964 in a pale green colour.

The introduction of Decimal currency in 1966 saw the issue of a new 4 cents Letter Sheet. The date of issue was 14 February 1966 (Figure 3) [the date of the introduction of decimal currency] and the sale price was five cents. Not long after, sometime in the year 1967 the rate was increased to 5 cents, and a new Letter Sheet released (Figure 4). The sale price was now 6 cents. No fixed date of issue was fixed, but the Letter Sheet was released either on the 29 September 1967, the date of the increase in postal rates, or early in October of that year.

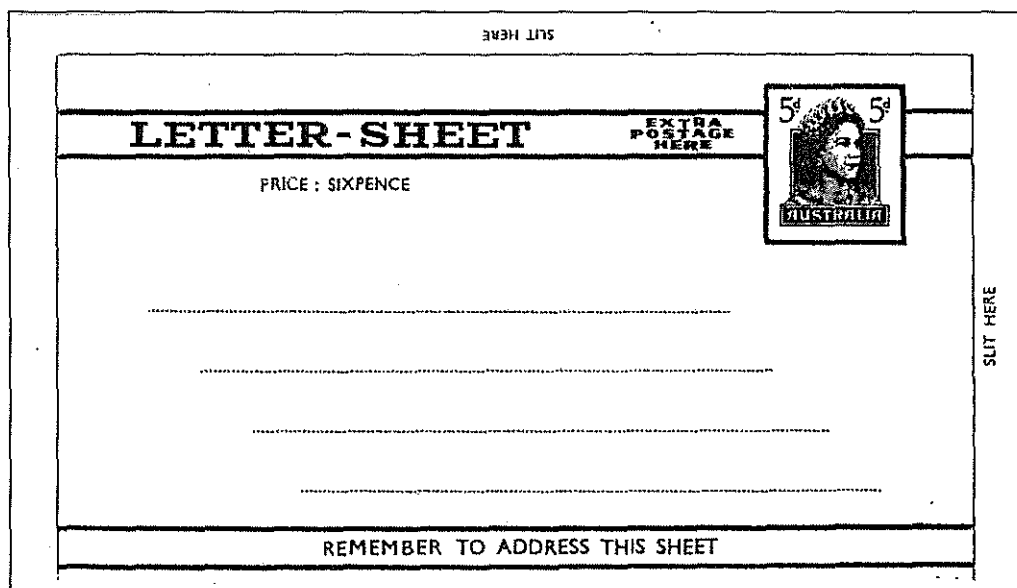

Figure 2 1961 5d Letter Sheet

The Letter Sheet was intended for correspondence within Australia for 5d. The Australia Post Collectors Bulletin of the time had this to say about the Stationery.

*The Lettersheet will be the same size and format as the current aerogramme but will be printed on heavier paper. The lettersheet will have a writing area three time greater than that available with the present lettercard and will be sold for 6d. The lettersheet will be available*

*Postal Stationery Collector*

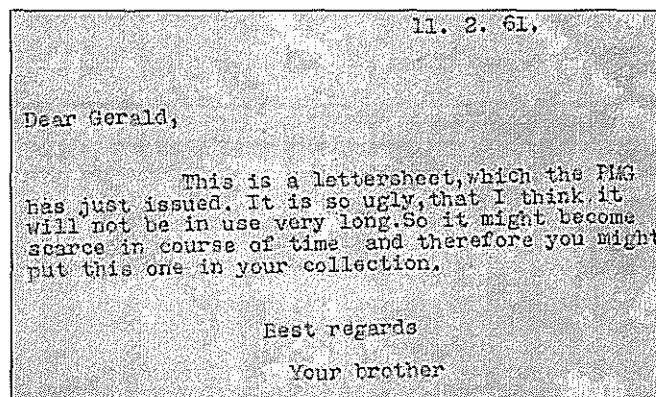

for transmission by airmail within Australia without additional payment. If the weight limitation is exceeded by the insertion of additional sheets of correspondence within the lettersheet itself, then additional postage will be required to be affixed. Additional postage will also need to be affixed when a lettersheet is posted to overseas countries to which the charge of 5d for one ounce does not apply. The lettersheet cannot be used in substitution for an aerogramme and, if sent by air mail to overseas addresses, the appropriate air mail letter postage is required.

*Figure 3 1966 Decimal 4 cents value*

*Figure 4 1967 5 cents value*

*Figure 5(a)*

An Australian collector recently came across a 1961 5d sheet used from Sydney to Johannesburg, South Africa (Figure 5). These Letter Sheets, being intended for internal use only, were not valid for foreign addresses without the addition of extra postage to increase the postage paid to the normal Air Mail letter rate. In 1961, the air mail letter rate for one ounce to South Africa was 2/3.

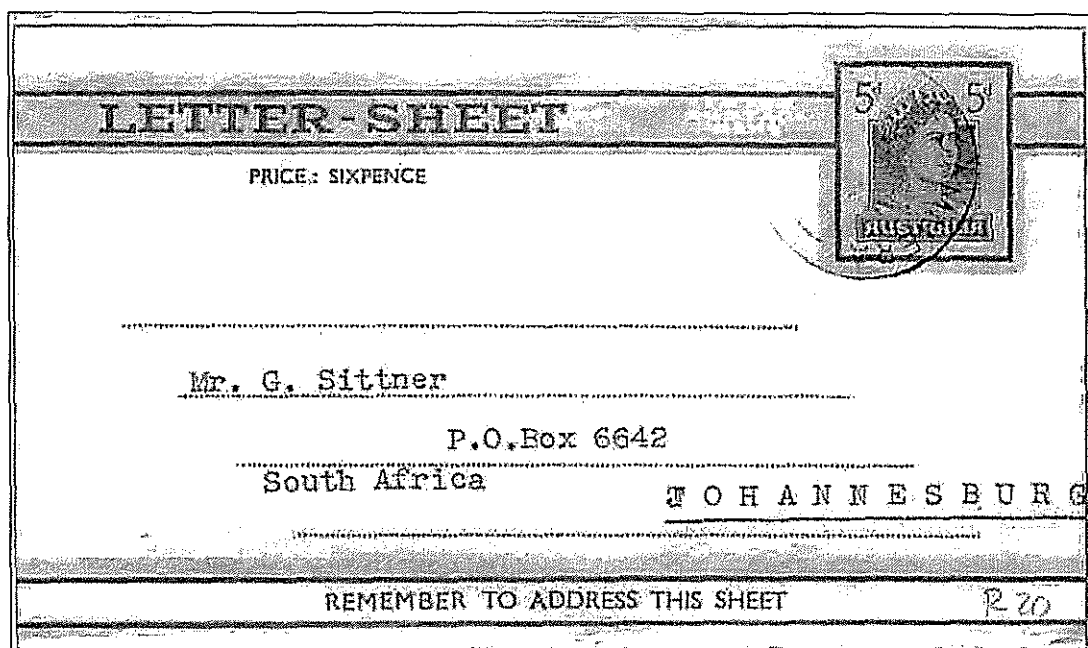

Figure 5(b) 1961 Letter Sheet to South Africa, without being taxed or fined.

Mr Sittner's comments to his brother Gerald, Figure 5(a), were in reality quite prophetic. I do not however agree with his comment on the ugliness of the design. For its day, it was in fact reasonably attractive.

These items are not commonly found used, although they are very common in mint condition. They are listed in the 1989 Seven Seas Catalogue (26th Edition) but their listing had been dropped at least by the 1999 Edition. Even then, these Catalogues only record the modern Letter Sheets, and ignored the 1929 and 1930 George V Official designs. These are listed in Higgins and Gage. The Letter Sheets was first inscribed in the 1961 issue as **LETTER-SHEET**, but was later inscribed as **LETTERSHEET** on the Decimal Letter Sheets, which is also the wording used in all official Press Releases.

The prophesy of Mr Sittner was well placed. The records show the sale of Letter Sheets was dismal compared to other comparable Postal stationery products.

STATIONERY	1964	1967
Letter Sheets	230,500	405,500
Registered Envelopes	536,640	977,510
Large Envelopes	619,200	1,833,050
Wrappers	943,200	2,420,500
Letter Cards	2,044,800	3,172,500
Small Envelopes	8,701,920	13,976,500
Aerogrammes	19,835,400	34,912,600

When sales of Wrappers and Letter Cards, generally considered to be poor sellers, exceeded the sale of Letter Sheets then there is little wonder that the product was discontinued. This last Letter Sheet had a extremely short shelf life, being withdrawn from sale in November 1968.

AUSTRALIAN NEW ISSUES

Ian McMahon

Christmas 2002 Aerogramme

The annual Christmas aerogramme was issued on 1 November 2002. The cachet depicts Mary and Joseph's flight into Egypt with the baby Jesus while the stamp area depicts an angel. The aerogramme was designed by Tracie Grimwood, Melbourne and printed by PMP Tasmania and sells for \$0.85.

Native Wildlife Postcards

A set of 10 native animal prepaid postcards depicting koalas, kangaroos, brushtail possums and the kookaburra was issued in mid-November 2002. The cards appeared to have first become available in Melbourne. The cards are in the new format with white border except that the Brushtail Possum card has a black border.

Sydney Opera House Postcard

A prepaid postcard depicting the Sydney Opera House has also been issued in the new format. The card was reported from Sydney in late October.

**Prepaid International Airmail Padded Bags**

From about 25 November 2002, Australia Post began selling a range of prepaid international airmail padded envelopes. Four envelopes are available:

- 500g satchel Asia Pacific (\$8)
- 500g satchel Worldwide (\$12)
- 2 kg satchel Asia Pacific (\$25)
- 2 kg satchel Worldwide (\$40)

**For an easier way to send gifts overseas, you'd need to grow wings.**

Next time you're sending gifts or merchandise\* overseas, don't get into a flap. Use Australia Post's convenient new prepaid Air Parcelpaks. Available at your local post office, these affordable plastic packs are suitable for items up to 2kg and come with prepaid postage, a protective bubble lining, Air Mail sticker, and simple customs declaration. Just put your gift inside the Air Parcelpak, complete the documentation and lodge it over the counter or post it in a red street posting box. It's as simple as that. To find out more, call 13 13 13 or visit [australiapost.com.au](http://australiapost.com.au)

Air Parcelpak. Your one stop pack for overseas deliveries.

The envelopes were advertised in the national press on 1 December 2002 with the publicity text reading:

*Next time you're sending gifts or merchandise\* overseas, don't get into a flap. Use Australia Post's convenient new prepaid Air Parcelpaks. Available at your local post office, these affordable plastic packs are suitable for items up to 2kg and come with prepaid postage, a protective bubble lining, Air Mail sticker, and simple customs declaration. Just put your gift inside the Air Parcelpak, complete the documentation and lodge it over the counter or post it in a red street posting box. It's as simple as that.*

### University of Sydney PSE

The University of Sydney PSE was reported in the last issue, however, a copy with a First Day cancel from the University of Sydney Post Office is illustrated below.

February 2003

**TAIWAN - CHINESE NEW YEAR 2003**

Betty van Tenac

**The Year of the Sheep**

The Directorate General of Posts, Taiwan issued a set of Domestic Postal Cards for New Year's Greeting on December 2, 2002. This set consists of twelve NT\$2.50 denomination postal cards. Each postal card bears an indicium of the New Year's Greeting Postage Stamps in the upper left-hand corner.

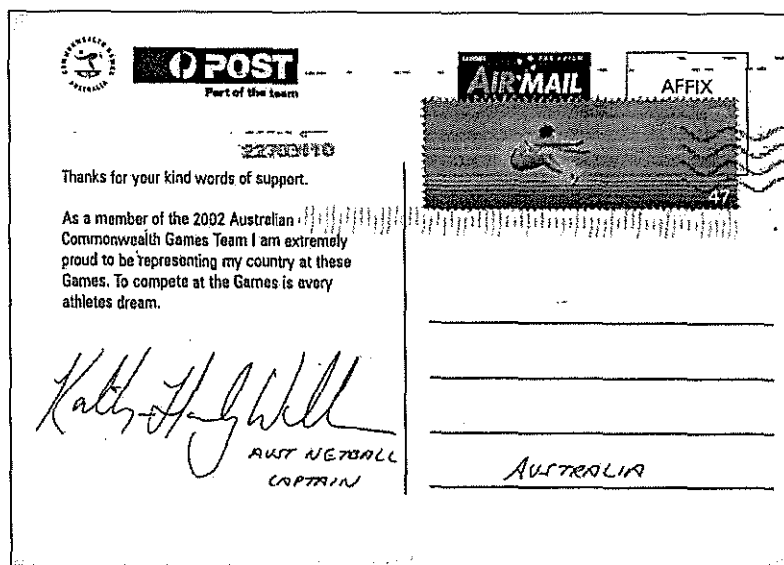

On the back of the twelve different postal cards are twelve representations of sheep, chosen from the competition for the design of the New Year's Greeting Postage stamps by twelve artists. The postal cards will be sold individually for \$2.50 each or NT\$30 a set. A specimen card and one of the 12 designs featured on the reverse of the card is shown below.

**MANCHESTER COMMONWEALTH GAMES UNSTAMPED POSTCARD**

Martin Walker has kindly provided an illustration of an unstamped postcard given by Australia Post to Australian Athletes at the Manchester Commonwealth Games to reply to letters from fans. Has anyone seen a postage prepaid version?

**QUEENSLAND FORMULAR REGISTERED ENVELOPE**

Bernie Beston and Ian McMahon

On the 14 September 2002, one of three known Queensland Formular Registered envelopes Size G (see the May 2002 issue of *PSC*) was sold at a Melbourne Auction for \$7,000 plus buyer's premium. At this time, it was not only the highest price paid for a piece of Queensland Postal Stationery, but evidenced the rarity of the piece and its provenance as being the first such used item publicly recorded. Another Formular Registered envelopes, in size H2, sold at the same Auction for \$9,000, plus buyer's premium. Both came from the collection of the late Hugh Campbell, however, the H2 envelope cannot be regarded as a Queensland issue, as it was not sold by the Post Office. Likely both registered envelopes were sold to off shore collectors.

Now, less than two months after that event, a truly remarkable situation has occurred. Two more Size G Formular Registered envelopes have come onto the market. Fortunately, both copies have been acquired by Australian collectors, and returned to this country from foreign hands.

The first is used to Sierra Leone on 12 June 1889. It is the earliest known item of Postal History and the first item of Postal Stationery recorded to that destination from Queensland [Figure 1]. It is also the latest recorded use of the envelope. The Envelope was posted from Bundaberg, at the 7d postage rate and 6d for registration. It appears to have been sent via Torres Strait and the direct route to the United Kingdom, and thence to Freetown receiving backstamps at Plymouth (28 July 1889), Liverpool (registered oval 29 July 1889) and Freetown (14 August 1889). This is consistent with the envelope having been carried on the Queensland Royal Mail Steamer, *Merkara*, which left Brisbane on 12 June 1889 and unloaded its mail in England on 28 July 1889.

The second is used to Austria on 23 November 1888. It has the earliest known recorded use on cover of the 1882 2/6 high value [Figure2] plus a 1d adhesive. Again this cover is used from Bundaberg.

This means that of the five used envelopes now recorded; three were used at Bundaberg and two at Townsville. As the issue was officially withdrawn from sale sometime in 1884, their late use from these two official Post Offices would indicate that some stock was not returned to the Distributor of stamps but kept in stock at the office and sold later. No records exist as to the policy or directions of the Postmaster General [or the Post Master at the Brisbane G.P.O.] as to stock returns, if any, at this time. Both of the new discoveries came from different sources, one from Germany and the other from England.

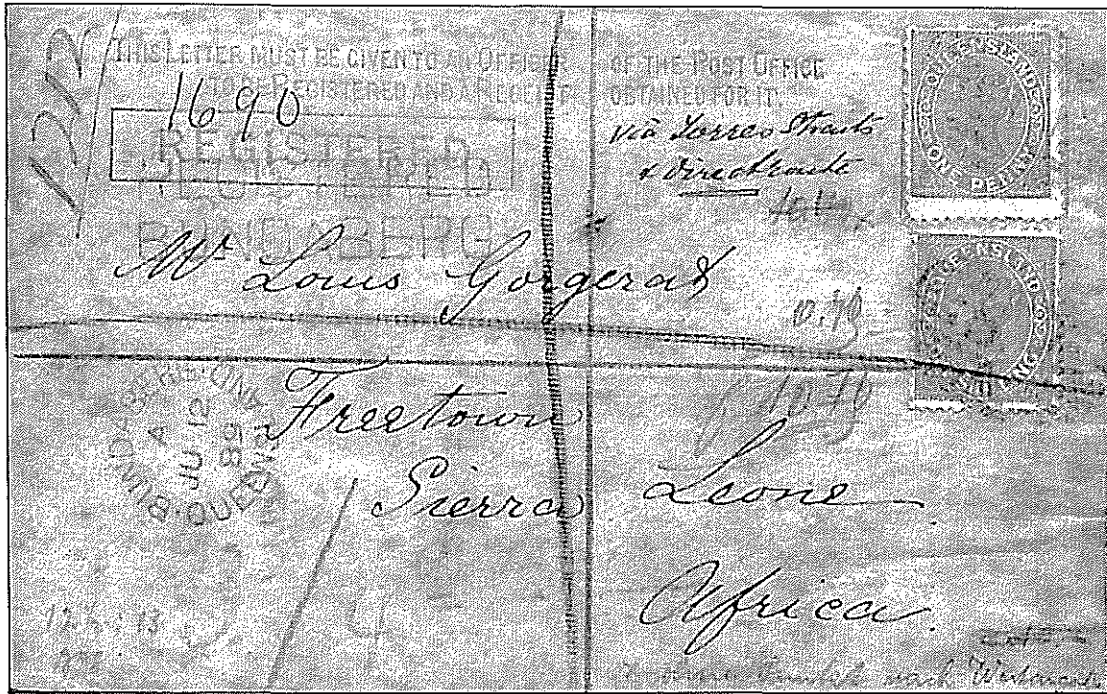

Figure 1 Bundaberg to Sierra Leone 12 June 1889

Figure 2 Bundaberg to Austria 23 November 1888.

**ITEMS OF CHARACTER – THE WHOLE STORY**

Judy Kennett

**Introduction**

I was interested to read Bernie Beston's note 'Postal Stationery: items of character' in *PSC* August 2002 p 42, concerning the illustrated Romanian postal card, Michel P 124 and H&G 105, that had 'come to the end of the line'. This particular design had an interesting life, through some turbulent times. It was first issued in 1942, in limited numbers, and intended for international use. Romania was already involved in WW2 in the Axis sphere of influence. The end of the war came on 12 September 1944 when King Michael signed a peace treaty with the Russians, but these cards continued in use, even after the abdication of the King on 30 December 1947.

At the time of the King's 'departure', new designs of stamps and stationery for the Romanian Peoples' Republic were not ready. It was decided that material already in post offices should be left as it was. Stamp stocks held in the State Printing Works were overprinted to meet the changed political climate. Current definitives (the design shown on Bernie's card) were overprinted with 'RPR' over the King's portrait. It seems that current stationery in stock was not overprinted, but users were 'encouraged' to put adhesives over the King's portrait in the stamp design.

**Back to the beginning**

In 1942, when this card was issued, the current rate for what is called an 'illustrated postal card' sent to a foreign country was 12 lei. The fact that the authority of the UPU is cited in the heading, and that the language of the heading is French, indicates that the card was intended for international use. I show a mint example of the card at Figure 1, then some examples from my collection of used cards that illustrate points about usage during and after the war.

*Figure 1 Mint card of 1942*

The example in Figure 2 shows an uprated card sent to Lyon, France, and posted on 21 Sept 1943. The adhesives to the value of 34 lei pay for airmail (14 lei) and registration (20 lei). The airmail component is indicated by the PRIN AVION label, but the registration is not indicated (a hand stamp was customarily used). Presumably, one of the manuscript numbers is the registration number.

The card was censored by both the Romanian authorities (boxed CENZURAT 3 marking) and by the German (circle with an apron, in red). For a final touch, there is a chemical wipe, a blue arc through the written message. This was a test used to detect secret writing. Of course, France was by that time in the German sphere of influence.

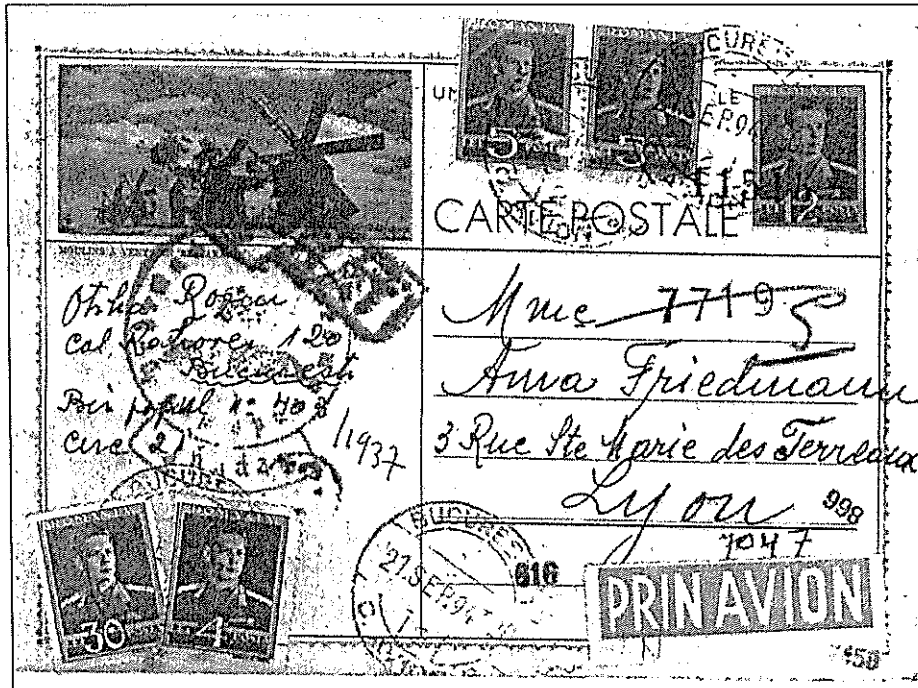

Figure 2 Card to France Sept 1943

The card in Figure 3 has not yet had its method of delivery completely explained. According to the tables of rates for the delivery of Romanian external mails from 1941-1945, it was possible to send mail only to countries in the German sphere of influence. Sweden was a neutral during WW2, but I have been told that examples of mails from German occupied countries have been found there. However, they were usually censored by the German High Command. This card bears no such censor

marking.

There are some points of interest on this card. It was posted in Bucuresti on 16 March 1944, and was registered, and passed by a Romanian censor. It's franked with an additional 10 lei adhesive, when registration cost 20 lei at the time, but there's no tax mark. Note that the sender's details – name and address (at a prominent Bucuresti hotel), also his Norwegian passport number, are carefully recorded. Whether this card travelled to Sweden through the Romanian external mail system, or by some diplomatic channel, I don't know, but it arrived in Stockholm on 31 March 1944.

Figure 3 Card to Sweden March 1944

King Michael signed a peace treaty with the Russians on 12 September 1944, and henceforth Romania was an occupied country. It was not until 1 May 1945 that mail services to many European countries were restored. It is claimed that inflation had begun to affect prices, including postal rates, as early as mid-1942. From 1945 postal rates rose approximately every six months as inflation devalued the country's currency. The remaining examples illustrate the course of the inflation.

Figure 4 shows a card sent to London. It was posted in Arad on 15 May 1946. By this time the external rate had risen to 200 lei and the 12-lei value of the card was disregarded when selecting adhesives to be used. The card seems over franked, but that may have been due to a shortage of the correct adhesives at Arad. A machine cancel on the back shows that the card reached London on 30 May 1946.

The next example (Figure 5) was posted on 30 November 1946 at Liebling, which is probably a small town in the country, to the US Zone of occupied Germany. By now the external card rate was 900 lei, and once again the value of the card was disregarded. The date on the Munich civil censorship machine cancel is not readable.

The final example (Figure 6) shows the card now adopted for internal usage in 1947. The rate for a postal card is now 1000 lei. It was posted at Campulung Moldovenesc on 18 April 1947, and its use thus falls within a period of 45 days between 15 March and 28 April 1947, one of the shortest lived postal rates in Romanian history. Once again, the value of the card was disregarded because of the difficulty in making up the necessary amount with adhesives available in the post office. The card was received in Bucuresti on 21 April 1947.

Figure 4 Card to UK May 1946

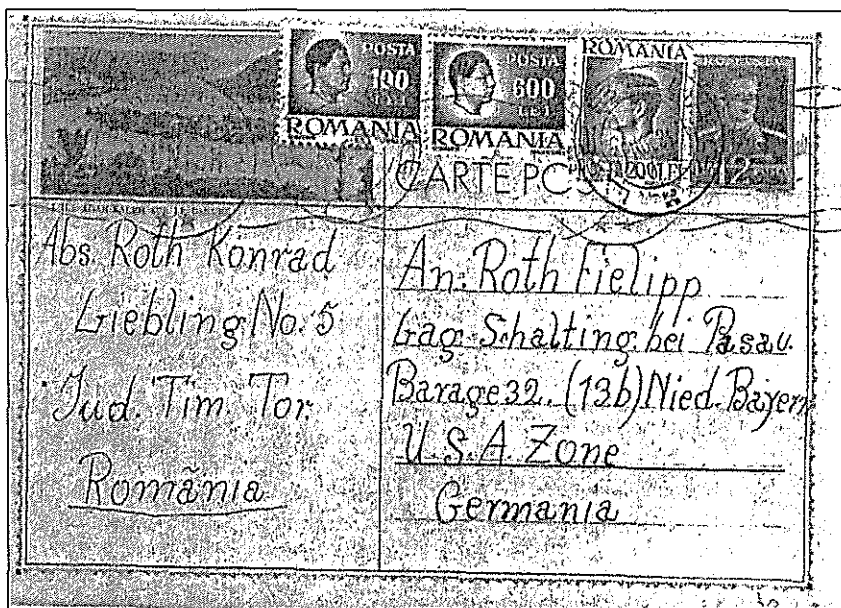

Figure 5 Card to Germany Nov 1946

On 28 April the rate for internal postage of cards rose to 7000 lei, and the external rate at that time was 11000 lei. On 15 August 1947 monetary reform was introduced which reduced the postal rates for cards to 7.50 lei (internal) and 8 lei (external). These were the applicable rates when King Michael was forced to abdicate on 30 December 1947. They remained current for about 12 months.

Now look again at Bernie Beston's card. It was posted at Arad on what appears to be 11 February 1948, and was addressed to Switzerland. It bears two adhesives from the King Michael definitive issue of 15 August 1947, both without the 'RPR' overprint over the King's portrait. However, they have been placed over the stamp design of the card.

Between December 1947 and December 1948 the Romanian communist government had issued a special charity stamp (IOVR), with the declared purpose of raising funds to help invalids, orphans

and widows of the war. This was mandatory on all correspondence sent abroad and within Romania. A 1-leu example is shown here. Finally, we have the three-line propaganda marking. The translation is 'Long live the Romanian Peoples' Republic'. This was one of a series applied to mail in this period, designed to arouse popular enthusiasm for the new republic.

*Figure 6 Card to Bucuresti April 1947*

### **Conclusion**

This article was fun to research and write, probably because the card design was available during 'interesting times'. We have a world war, invasion by a foreign power, installation of a 'virtual' communist government, the end of the monarchy, the declaration of the peoples' republic, with the attendant political changes, and then nationalisation of all privately owned property. The cards discussed have reflected some of these social and political changes.

For the information used to produce the article, I made extensive use of the book and articles cited below, and my thanks go to ing Calin Marinescu of Bucuresti Romania, and to Dinu Matei of Toronto Canada for their work.

**FROM THE SECRETARY**

**New Members**

Welcome to the following new members, who have joined since the last issue of the journal. They are (with a short description of their postal stationery collecting interests, where supplied):

Gerard Carlin (NZ) – NZ King George VI stationery;  
Robert (Bob) Shoemaker (USA) – the South Pacific region;  
Graham Murray (Vic) – the Australian colonies.

**Meeting at Melbourne 2002**

Reports from the Secretary and the Treasurer were presented, and appear in this issue, together with the minutes of the meeting. My thanks to Mark Diserio, who took them in my absence.

**Subscriptions for 2003**

A statement was sent to each financial member with the November issue of the *Postal Stationery Collector*. This indicates whether you have already paid for 2003, or need to forward a subscription to the Treasurer. Members who have paid will find their receipts in this issue of the journal.

**Congratulations**

I see from the December 2002 issue of the *Australian Journal of Philately* that our member Frank Pauer was elected president of the Australian Philatelic Society late last year. Congratulations Frank.

**Review of *Postal Stationery Collector***

In the Fall 2002 issue of *The Informer* is a brief review of *Postal Stationery Collector* written by David McNamee, one of our US members. He comments on the content of the journal, particularly the variety of countries covered, and on the mix of original research and the listing of new issues, plus information on current postal services. Two regular features that he particularly mentions are the 'Listing of Australian Non-Denominated Postal Stationery', and the literature section, both reviews and the listings of articles from the general philatelic press and from postal stationery journals. Thank you, David, for your comments.

***From Our Contemporaries***

**L'Entier Postal No 63 Decembre 2002**

Some items of note in this issue:

- \* An appeal for help, for information on certain French aerogrammes. The editors of the catalogue know that these items have been announced, but have not seen copies;
- \* A survey of varieties found on modern 'Pret-a-Poster' (ready to post) stationery;
- \* The study of the interzone cards Type 'Iris' (non-denominated);
- \* The re-evaluation of the selling price of used foreign reply paid coupons.

**L'Intero Postale No 81 Autunno 2002**

In this issue we have articles on the following:

- \* Return to Somalia Afis – new information on the 60 centesimi aerogramme;
- \* More about Suchard – a series of postal cards, from the chocolate maker Suchard;
- \* A note from the market – La Repubblica Sociale Italiana at its peak. The article examines the prices of postal stationery material from this period.

**American Philatelist December 2002**

In this issue, we find the author, geographical and subject indices for article published in the journal during 2002. Under the heading 'Postal Stationery' in the subject index are citations for articles on advertising cards, letter sheets, and postal cards.

**Vale: John Howard Beachboard 1925-2002, Leroy Collins**

John H. (Jack) Beachboard, who served the United Postal Stationery Society as editor of five editions of the *United States Postal Card Catalog*, died December 16, 2002 at his home in Alexandria, Virginia. As editor of the USPCC from the fifth edition through 2000, Jack developed the catalogue to a volume of 470 pages, a 60-page increase over 1995's edition alone, with the catalogue becoming an all-inclusive reference to include international card rate tables, descriptions of modern postal card papers and exposition postal cards and cancels. An honorary life member of the UPSS, Jack contributed 27 articles on postal cards to *Postal Stationery* over a 16-year period and served on the journal's editorial board as Associate Editor, U.S. Postal Cards from 1991 to 2000. In August 2002 he was inducted into the Writer's Hall of Fame by Writers Unit 30 of the American Philatelic Society. A native of Aberdeen, Maryland, USA and an electrical engineering graduate of the University of Maryland, Jack was a civilian engineer working on rocketry for the Army's Ballistic Missile Agency under Wernher Von Braun. He was part of the rocketry team that was eventually incorporated into the National Aeronautics and Space Administration. He retired from NASA in 1980.

**Minutes of PSSA Melbourne Meeting, Mark Diserio**

Minutes of the Meeting of PSSA held in the Bronze Room at *Stampshow Melbourne 2002* on Sunday, 6 October 2002, 2:00 to 3:30. Ian McMahon presided. Apologies were received from Judy Kennett, John Crowsley and Brian Pope. In attendance were Hans Karman, John Wilkins, Neville Solly, Philip Levine, Joan Orr, Wayne Menuz, John Rennie (visitor), Ross Wood, Ray Todd, Norman Banfield, Mark Diserio, Chris Smith, Malcolm Groom and Darryl Fuller.

Ian circulated the Treasurer's Report. Discussion ensued prompted by Bernie Beston's suggestion that the Treasurer's recommendation that the subscription be increased by \$5.00 per year was not enough and that it should be increased by \$10.00 per year. A motion that the Society's subscription be increased by \$10.00 per year was moved by John Wilkins and seconded by Malcolm Groom and was carried on a show of hands. Ian McMahon circulated the Secretary's Report. Particular notice was taken of the current membership of 94 and there was discussion about 120 members being a more sustainable number, although no particular action was noted. Ian advised that work on the Index by Derek Brennan is continuing. The success of the Journal exchange program was also noted. This provided an opportunity to warmly welcome member Wayne Menuz from California and acknowledge the broader content of *Postal Stationery*, the journal of the United Postal Stationery Society, since he assumed editorship.

Malcolm Groom then reported on the Catalogue Series. He reported that 120 Western Australia catalogues had been printed, most which had now been sold. The kind support of Australia Post in the catalogue's graphic design and production was warmly acknowledged. This assistance was likely to continue for the next catalogue. Acknowledgement was also given to Arthur Woo for making colour illustrations of items from his Western Australia collection available to the Editor. Malcolm also reported that the expected production schedule of forthcoming catalogues was Queensland, South Australia, and Tasmania. The great effort involved in the compilation of the New South Wales and Victoria parts was noted. Some progress is being made through the individual efforts of particular members. There was a brief discussion about publishing corrections, updates and new discoveries relating to the catalogues. Suggestions included publishing them as part of the *Postal Stationery Collector*, as a supplement to the journal and even including them in the next section to be published to encourage further sales of that catalogue. No final decision was taken. Malcolm Groom invited suggestions for improvement in forthcoming productions and some ideas were noted from the discussion, including inviting 'scans' from the membership of items still required.

There being no further items of business to be transacted, Ian McMahon introduced John Wilkins to talk about his display of three frames of Afghanistan postal stationery. John mentioned that he was in the process of producing a comprehensive catalogue of Afghanistan with three other collectors from Australia, the United States and Scotland. This would include postal stationery. John offered to allow the Society to serialise the stationery section in the *Postal Stationery Collector* in due course if the Society wished. John made particular reference to the country's first stationery issues in 1903 and in 1906, which was an interim issue consisting of an envelope specially "post marked" which could be purchased from the Amir Habibullah Khan's post office at Peshawar. John also made special remarks about the "Agency Period" from 1960 to 1964 when a New York company sold Afghanistan's postal emanations on behalf of the country. To give official status to these issues, the government in Afghanistan would apparently place the issue on sale in Afghanistan at an unannounced post office at an unannounced time for twenty minutes. John also gave a word of caution about the status of some stationery varieties often found on the philatelic market. Many of these were said to have followed the decision of the King to abolish the Agency arrangement and were possibly created at the initiative of officials in the

Philatelic Bureau to enhance their own personal wealth now that they had the opportunity. The meeting was also treated to one frame of Canadian letter cards courtesy of Ian McMahon. The meeting ended with much discussion between attendees who were either refreshing old friendships or making new ones.

### **SECRETARY'S REPORT 2001-02**

#### **Meetings**

The Society last met at Brisbane StampShow 2001 on 27 October 2001. An informal gathering took place in March of this year at Canberra Stampshow 2002.

#### **Membership**

This currently stands at 94 financial members in Australia, New Zealand, and a number of overseas countries. We lost a few members at the end of last year, but have gained a batch of new ones through referrals, the publicity generated by the sale of the Western Australia postal stationery catalogue, and through the link to the Philatelic Society of Canberra website.

#### **Postal Stationery Collector**

The journal continues to flourish, through the efforts of the contributors and of the Editor, Ian McMahon. It is not possible to over-emphasise the value of the work he has put into the journal since 1995. There is still concern at times at the drying-up of contributions from members. We still need short pieces, long articles, notes, letters, comments and interesting items from all our members, to help maintain the variety of content and the quality of the journal. Contributions from non-members are always welcome too. The *Postal Stationery Collector* continues to receive meritorious awards in international exhibitions, and the latest are:

Hong Kong 2001            Silver            Philanippon 2001            Silver.

#### **Journal – Index Volumes 1-5**

Because of other commitments, the compiler has not been able to continue with work on the index. WE apologise for the delay, and hope for completion early in 2003.

#### **Journal – Exchanges**

Our system of exchanging the journal for the publications of other collectors' groups is continuing. We have recently commenced another exchange, this time with the Society of Australasian Specialists / Oceania, which is based in the USA. The total number of exchange arrangements is now eight, which includes the deposit copy sent to the National Library of Australia, and the copies sent to the American Philatelic Research Library and the Royal Philatelic Society, London.

#### **Publicity for the Society**

An article about the aims of the Society, and our publishing project, the Postal Stationery of the Australian Colonies / States was prepared by the Secretary in May, and was published in the July-August issue of *Postal Stationery*, the journal of the United Postal Stationery Society. A review of Part 1 of the catalogue appeared in the same issue. This resulted in both new members and additional sales of the catalogue.

#### **The Catalogue of the Postal Stationery of the Australian Colonies / States**

Part 1 of the project, the postal stationery of Western Australia, has now been published, and sales, to both members and non-members, have been very satisfactory. The response from dealers has been pleasing, indicating that they feel there is an audience for the publication. Malcolm Groom, the Series Coordinator, will report during the meeting on the progress of forthcoming parts of the series. It was found necessary to produce an amendment list for the Western Australia part, and this will be distributed with the next issue of the *Postal Stationery Collector*.

This has been a busy year for the Society, and it has been an honour to have an active role in its running.

**LISTING OF AUSTRALIAN NON-DENOMINATED POSTAL STATIONERY  
(NEW ISSUES)**

Ian McMahon

*Copies of a consolidated version of this listing up to the end of 2002 are now available from the Editor. Please see the Literature section for details.*

<b>Postcards</b>		7 January 2003	Lunar New Year
1 November 2002	Christmas	(\$1.20)	Year of the Goat
Maximum cards			
(-)	Nativity Scene	<b>Aerogrammes</b>	
(-)	Wise Man	1 November 2002	Christmas 2002
(Set price: \$2.35)		(\$0.85)	Christmas
November 2002	Native Animals		
(\$1.20)	Brush-tail Possum	<b>Envelopes</b>	
(\$1.20)	Kookaburra	7 January 2003	Lunar New Year
(\$1.20)	Female Koala with Young	(0.60)	Year of the Goat
(\$1.20)	Koala	(\$1.80)	International envelope
(\$1.20)	Sleeping Koala		
(\$1.20)	Baby Koala	<b>Express Post</b>	
(\$1.20)	Kangaroo	(?)	Very large satchel
(\$1.20)	Female Kangaroo with Joey	(-)	3 kg very large satchel
(\$1.20)	Young Red Kangaroo	Note: Similar to the 5kg satchel previously reported.

Journal on an Aerogramme	

**LISTING OF AUSTRALIAN NON-DENOMINATED POSTAL STATIONERY**

In its first issue, *PSC* included the first instalment of a listing of Australian non-denominated stationery. Once the original listing was completed, almost every issue of the *PSC* has included an update to the listing. To facilitate use of the listing, a consolidated listing, up until the end of 2002, is available from the Society. The listing runs to 44 pages and is stapled with some illustrations and is available from Ian McMahon, PO Box 783 Civic Square ACT 2608 Australia for \$10, postage paid within Australia (add \$2.50 for postage overseas). Cheques should be made payable to the Society.

**BOOKS**

***The Postal Stationery of Iran* by F N Farahbakhsh**

Detailing the postage prepaid postcards, envelopes, newspaper wrappers, picture postcards, aerogrammes and insurance envelopes of Iran, this book is in both English and Arabic. It is profusely illustrated in colour and is available from Vera Trinder 38 Bedford St Strand London WC2E 9EU UK for £18 pounds.

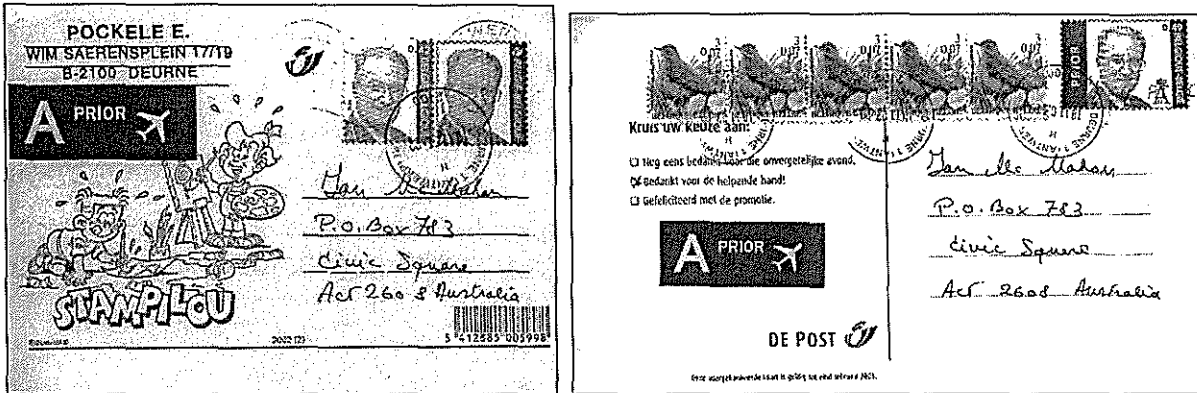

***Die Postkartenheftchen der Schweizer Post 1912-1992* by Ernst Jaeger**

Booklet postcards of Switzerland. 142 pages, softbound, Illustrated. Published by the SwissPostal Stationery Society (18 euros).

NEW ISSUES

Belgium

Edgard Pockele-Denis provides an example of a publicity card issued to announce a new two-level postage tariff in Belgium: a 'slow' inland rate of 0.41 euros and priority (guaranteeing delivery next day if posted before the last pillar box collection) of 0.49 euros. Each household received one publicity card. The Flemish version is shown; they also exist in French and German versions which were distributed in the French and German speaking parts of the country. The 'slow' and priority rates for Europe are 0.52 and 0.59 euros and for the rest of the world 0.57 and 0.85 euros respectively.

Hong Kong

Hong Kong has recently issued a series of postcards depicting the 'rocks of Hong Kong'.

New Caledonia

Recent stamped envelopes commemorate the 'Fete du Café 2002', the 25th anniversary of the Agricultural Show and the Grimimi Chateau.

USA

USA issued four 23c Christmas postcards for 2002 depicting snowmen. The cards were issued in sheets of four.

New Zealand

New Zealand issued six \$1.50 postcards on 4 December 2002 to mark the release of the second film in the Lord of the Rings Trilogy, *The Two Towers*:

- Aragorn
- Legolas
- Wormtongue and Saruman
- Gandalf the White
- Samwise and Frodo
- King Théoden

The set was sold for \$12. Also shown is the front of one of the \$1.50 postcards for the America's Cup described in the last issue.

UK

The Welsh version of the 2002 UK Christmas aerogramme is illustrated below.
