

Catalogue Listing of NSW Railways Pictorial Postal Cards and Postcards (PPC's)

This catalogue includes both the Railways postal cards and the Railways picture postcards (PPC's). The postal cards are distinguished by either format of impressed 1d Shield stamps and Dividing Lines 1 to 4. The picture postcards are either Dividing Line 1 or 5 with no impressed stamp and, on used copies, use of the GR perfinned 1d Shield adhesive stamp. Catalogue values are in Australian dollars and follow the traditional catalogue format of unused on the left, used on the right. The valuation of cards by Dividing Line is based on cards observed in auctions or collections. There is some indication from the cards seen to date and auction results that unused cards are considerably fewer than used. Additional valuations will be added as new variations are observed or reported.
